Preguntas del examen

ACP-120

Jira Cloud Administrator

1. Your Jira cloud instance has hundreds of projects which are used only by the development team at your organization.

All projects share a single permission scheme New business requirements state:

? Customer support staff at your organization need to view all issues in all projects

? They also need to share filters with other users

? They should not be granted too much access

Identify the appropriate way to configure customer support staff in Jira (Choose one)

A. As a security level

B. As a new project role

C. As a new group

D. With the Trusted role

E. With an approved domain

Answer: C

2. You set up an incoming mail server and a mail handler to Create a new issue or add a comment to an existing issue

Which three additional options can you set with the mail configuration

A. Set the environment system field

B. Set a custom field

C. Set watchers

D. Create new users based on the From address

E. Set a default reporter

Answer: B C, D, E

3. Gary complains that he is not getting any notifications when issues are updated.

According to the notification helper, he should receive notifications for all issues he is watching. His coworkers confirm they receive those notifications and they regularly update issues that he is watching.

Which update to Gary's personal settings must have occurred (Choose one)

A. The setting Watch your issues was disabled

B. The setting You make changes to the issue was disabled

C. The setting You're watching the issue was disabled

D. The setting Email notifications format was changed

Answer: C

4. You created a new project and need to configure notifications.

Managers should be notified when

? Someone mentions them while adding or editing a comment

? The issue assignee or reporter is changed

? Issue links are added or deleted

You assume that users have not turned off any notifications through their Personal settings Identify the two notification events to which managers should definitely be added (Choose two)

- A. Issue Updated
- B. Issue Deleted
- C. Generic Event
- D. Issue Assigned
- E. Issue Commented

Answer: A, D

5.The Legal team has the following requirements

? Notify a list of individuals when issues are set to Pending status

? Allow project administrators to manage that list on an ongoing basis

Which combination of two configuration elements will meet these requirements (Choose two)

- A. Group
- B. Workflow validator
- C. Custom Event
- D. Project Role
- E. Workflow condition

Answer: C, D

6.Which configurations do NOT have any impact on user notifications? (Choose one)

- A. Gadget configurations
- B. Custom events
- C. Personal profile settings
- D. Permission schemes
- E. Workflow post functions

Answer: A

7.Henry was recently assigned multiple issues in a classic software project. He has not received any email notifications about the assignment of these issues but he received notifications about other changes to issues from this and other projects. Identify two possible reasons (Choose two)

- A. The Issue Updated event does not list the current assignee as a recipient in the project's notification scheme
- B. The Issue Assigned event does not list the current assignee as a recipient in the projects notification scheme
- C. Henry is missing the Browse Projects project permission in the Jira project
- D. Henry adjusted his personal email notification preference to not notify him when he

is the assignee of an issue

E. Henry is missing the Assignable User project permission in the Jira project

Answer: B D

8. Alana has set up a new incoming mail handler to create issues or add a comment to an existing issue.

All new issues should be unassigned to triage them individually. You have not set up any components.

Sometimes issues are being randomly assigned to various users upon creation.

Which configuration can cause the observed behavior? (Choose one)

A. An Update Issue Field workflow post function

B. The CC Assignee setting of the mail handler

C. The Default Assignee project setting

D. An Assign to Lead Developer workflow post function

Answer: C

9. Carlos describes his problem in the classic HR project

? He cannot attach files to issues of Request issue type when they are in the Approved status

? He can attach files to issues of Request issue type in any other status

? He can attach files to every other issue type in every status

He asks for your help in determining the root cause. Select the root cause (Choose one)

A. There is a workflow step property configured

B. He is not a member of a security level

C. The Attachment field is missing on the screen used by the Request issue type

D. He does not have the correct project permission

E. There is a workflow condition configured

Answer: A

10. You are a site administrator.

You have created an account for Ashley

You need to log in as Ashley to ensure his permissions are set correctly. Identify why you are unable to log in as Ashley (Choose one)

A. You are not an organization admin

B. Ashley has not accessed your site yet

C. Ashley does not have a managed account

D. Ashley has the role of site admin

Answer: C

11. You are a site admin for your company.

Which function can you NOT perform? (Choose one)

- A. Enable Single Sign On for your Atlassian Cloud site(s)
- B. Configure products in your Atlassian Cloud site(s)
- C. Enable invite links for your products
- D. Deactivate a Cloud site
- E. Manage users and groups

Answer: D

12. You need to implement a change to several classic projects in your Jira instance
? A defined set of users needs to be able to create issues on behalf of other users. It is important to note that

? Project administrators should be able to decide which users are able to perform this operation

? Some projects use a shared permission scheme

Which combined use of two administrative items will meet this requirement? (Choose two)

- A. Project role
- B. Global permission
- C. Project permission
- D. Individual users
- E. User group

Answer: A, C

13. You are the site and organization admin of a Jira Software and Confluence instance.

You are the only administrator and you don't have any Trusted users.

Users currently cannot send invitations to anyone. You need to control the number of licenses used.

Therefore, you want to either invite individual users or approve individual user requests.

Which site access setting will meet this requirement? (Choose one)

- A. Approve any domain
- B. Approve your organization domain only
- C. Don't approve any domain
- D. Enable Jira Software and Confluence invite links
- E. Enable existing users to send invitations to anyone

Answer: C

14. Mira is working on a story. All of a sudden, the links to all three bugs related to the story disappeared. All issues including the story and the three bugs are tracked in the DEV project, which is a classic Software project.

Which four can explain the situation (Choose four)

- A. Issue linking was disabled globally
- B. Link issues permission was revoked for Mira
- C. The links to the bugs were deleted
- D. The linked bugs were deleted
- E. Browse Projects permission was revoked for Mira
- F. A security level was applied to the linked bugs

Answer: A, B, C, D

15. You are setting up Jira Software Cloud for an organization of 250 employees. Product access is already configured to grant new users access to Jira Software by default.

You now need to configure site access so that it meets these 3 conditions

- 16. Minimum administration overhead is required
- 17. Access is granted to the entire organization at the same time
- 18. Access is restricted only to your organization

Which solution meets these requirements? (Choose one)

- A. Set the global mode to public and enable CAPTCHA on sign up
- B. Create an invite link and share it with all current and future employees
- C. Enable existing users to send invitations to all current and future employees
- D. Add all your company's domains as approved domains
- E. Approve any domain in the site access settings

Answer: D

19. DEV and ENG projects share the same permission scheme. Users of both projects also work in a single board that shows both DEV and ENG issues.

However some users cannot move issues across the board or move issues between the two projects. Identify the configuration related to this problem. (Choose one)

- A. Product access
- B. Project permissions
- C. Board permissions
- D. Global permissions
- E. Security levels

Answer: B

20. Users have been adding sensitive information into the Description field of issues in a particular project. You must secure the project by any means necessary so that only members of the Managers group can view the contents of the Description field.

Which approach will definitively satisfy this requirement? (Choose one)

- A. Remove everyone from the browse projects permission
- B. Remove the description field from the screen used by the view operation
- C. Remove everyone except the managers group from every project permission
- D. Hide the description field in the field configuration
- E. Remove everyone except the managers group from every project role

Answer: B

21. Which three statements are correct about deleting a user account? (Choose three)

- A. Access to all products and administration functions will be lost
- B. Issues that were created by a deleted account will be deleted
- C. Individual users can delete their unmanaged accounts
- D. Accounts can only be deleted if they have no issues assigned
- E. Organization admins can delete managed accounts

Answer: A, C, E

22. A new user needs access to all applications of your Atlassian Cloud site to configure projects without consuming any user licenses.

Select two items which, when combined, will satisfy this requirement? (Choose two)

- A. Trusted user role
- B. Administration access
- C. Individual users
- D. User groups
- E. Site access
- F. Product access

Answer: B E

23. In his personal settings, Bob has the setting "Email notifications for issue activity" set to "Don't send me email notifications".

Identify two reasons why Bob continues to receive some email notifications from Jira (Choose two)

- A. Bob has the Watch your issues setting enabled
- B. Bob has been subscribed to several filters
- C. Bob was added as a watcher of an issue
- D. Bob is mentioned directly in a comment
- E. Bob was sent an email via the Send email feature in Jira

Answer: B, E

24. Billie needs to perform various restricted tasks in the system. You must decide whether to grant her site admin or organization admin privileges.

Identify two reasons why you must make her an organization admin (Choose two)

- A. Billie needs to log in as other users for troubleshooting user accounts
- B. Billie needs to enable other users to be organization admins
- C. Billie needs to remove users from the site
- D. Billie needs to make changes to user's profiles
- E. Billie needs to enable other users to be site or product admins

Answer: B C

25. Your organization uses Jira Software and Confluence.

Dave is a new employee who needs the following privileges

? Approve access requests

? Manage group memberships

? Update billing details

You need to give him enough but not too many privileges. How should you configure

Dave's user account? (Choose one)

- A. As a member of the jira-administrators and confluence-administrators group
- B. As a site administrator
- C. As an organization administrator
- D. As a member of the administrators group
- E. As a trusted user

Answer: C

26. You are adding a user to Jira software using the invite users method in user management.

Which setting on the page guarantees the user access to Jira software (Choose one)

- A. Group membership
- B. Email domains
- C. Product access
- D. Email address

Answer: C

27. Your Jira instance has a Select List custom field named Application, which lists all the Atlassian offerings. You need to write a JQL query that shows all issues due within the next month for Jira, Trelb, and Jira Align applications.

Which query will satisfy the requirement?

- A. Application IN (Jira,Trelb, ^Jim Align.) AND • &iodate >. startOrMonth(1) AND &iodate <= endOrMonth(1)
- B. Application IN (Jira, Trelb, ^Jim Align-) AND • (duedate>= startOrMonth(1) OR duedate <= endOrMonth(1))
- C. Application IN (Jira,Trelb,Jira Align) AND • (duedate>= startOrMonth(1M) AND duedate<= endOrMonth(1M))
- D. (Application =^Jire^ OR Application = ^Trelb. OR Application = ^Jim Align-) AND duedate startOrMonth(1m) AND duedate <= endOrMonth(,m)
- E. Application = ^Jim^ OR Application = OR • Application = ^Jim Align^ AND duedate startOrMonth(1) OR duedate <= endOrMonth(1)

Answer: C

28. Your management team needs to see a list of only those issues that were resolved in the previous week, from Sunday to Saturday. The list needs to be sent to them each week on Tuesdays. You plan to create a saved filter and filter subscription to do this.

Which JQL query will return the correct results?

- A. resolved endOfWeek(1)
- B. resolved ,= startOfWeek(-1) AND resolved startOfWeek()
- C. status changed TO RESOLVED BEFORE startOfWeek()
- D. resolved>=startOfDay(-7) AND resolved <startOfDay()

Answer: B

Explanation:

- A. Incorrect. -resolved >. endOfWeek(1). will return all issues resolved this week, up until Tuesday when the filter is sent.
- B. Correct. ^resolved ,= startOfWeek(1 AND resolved < startOfWeek() ensures that only issues created in the previous week, from Sunday to Saturday, are returned by the query. The startOfWeek() function returns Sunday 00:00 by default.
- C. Incorrect. Resolved issues do not necessarily have their status changed to Resolved. Issues may be resolved with a status of Done or Closed as long as the Resolution field is set. Additionally, the query will return all issues that have ever been transitioned to Resolved status, not just from last Sunday to Saturday.
- D. Incorrect. -resolved >= startOfDay(-7). is actually a Tuesday. So this filter will return all issues resolved from Tuesday of last week to Monday of this week.

29. A team in your company requests a new Jira project that fulfills the following requirements:

- Ability to work on issues in weekly iterations
- Allows the project administrators to create their own fields

The project should fulfill these requirements right after creation without the need to enable additional features.

Which project should you create?

- A. A company-managed project with Kanban template
- B. Company-managed project with Scrum template
- C. Team-managed project with Canban template
- D. Team-managed project with Scrum template

Answer: D

30. Currently, several groups and project robs are listed in every system event of the DEV Notification Scheme and should remain that way. A new requirement states that when DEV issues move from the status Open to status Assigned, only Project Rob (Managers) should be notified. DEV project does not share any of its schemes. Identify the event that needs to be configured.

- A. Custom event
- B. Issue Moved
- C. Issue Assigned
- D. Work Started On Issue

Answer: C

31. Which configurations do Not have any impact on email notifications sent to users

- A. Workflow post functions
- B. Version Configurations
- C. Custom Events
- D. Premission Schemes

Answer: B

Explanation:

- A. Incorrect. Workflow post functions fire events. These can be mapped to recipients in a notification scheme.
- B. Correct. Versions can neither be configured to send notifications nor will they trigger notifications.
- C. Incorrect. Notification schemes can pick up custom events if they are configured to be fired in a workflow.
This way a custom event can impact notifications.
- D. Incorrect. A permission scheme is related to notifications. Users will only receive notifications for projects and issues they can assess.
- E. Incorrect. Saved filters can be used for filter subscriptions to send out filter results. So they are related to notifications

32. Which three factors should you consider when deciding between Jira Cloud and Jira Server? (Choose three.)

- A. the ability to integrate Jira with a cloud-based source repository (e.g. Bitbucket)

-
- B. the amount of time required for system administration
 - C. the availability of a REST API
 - D. the commercial apps you would like to use
 - E. the ability to integrate with an external user directory (e.g. company LDAP directory)
 - F. the number of workflows you will require

Answer: BCD

Explanation:

Reference: <https://confluence.atlassian.com/cloud/compare-atlassian-cloud-vs-server-744721664.html>

33. You want to introduce Jira to your small non-profit organization.

Since you are unsure of the optimal deployment option you have gathered some requirements:

- You need to manage a team of up to 15 employees.
- You need to be able to track a backlog of staff action items.
- You want to easily visualize the progress of ongoing work.

The solution must require minimal administration since your organization only has a part-time IT volunteer.

What solution is most appropriate for your organization?

- A. Jira Service Desk Cloud
- B. Jira Software Data Center
- C. Jira Service Desk Data Center
- D. Jira Core Server

Answer: A

34. The marketing team has asked you to embed the trigger tab of an issue collector on several internal web pages and change its size, color, and text. They also want the ability to track which webpage finally generated the underlying feedback issue. You are not familiar with advanced issue collector configuration.

Which type of developer should you contact for assistance?

- A. Groovy
- B. JavaScript
- C. Velocity
- D. Python
- E. SQL

Answer: B

Explanation:

Reference: <https://confluence.atlassian.com/adminjiracloud/using-the-issue-collector-776636529.html>

35. Your Jira has 25,000 active users across the globe using 100 projects with over a million issues.

Another administrator has made a change to a field configuration scheme and you now need to re-index Jira.

What would be the impact of rebuilding the index in the foreground?

- A. Issues will take longer to display during the re-index.
- B. Database backups cannot be run until the re-indexing is complete.
- C. The configuration change will not be applied until re-indexing is complete.
- D. Searches using the field may show erroneous results.
- E. All users will be locked out of Jira until re-indexing completes.

Answer: C

36. The configuration details of an SMTP Mail Server of a Jira instance are shown below.

Preguntas de práctica ACP-120 - Apruebe su examen con las últimas preguntas y respuestas

Update SMTP Mail Server

Use this page to update a SMTP mail server. This server will be used to send all outgoing mail from JIRA

Name *
The name of this server within JIRA.

Description

From address *
The default address this server will use to send emails from.

Email prefix *
This prefix will be prepended to all outgoing email subjects.

Server Details

Enter *either* the host name of your SMTP server *or* the JNDI location of a javax.mail.Session object to use.

SMTP Host

Protocol

Host Name *
The SMTP host name of your mail server.

SMTP Port
Optional - SMTP port number to use. Leave blank for default (defaults: SMTP - 25, SMTPS - 465).

Timeout
Timeout in milliseconds - 0 or negative values indicate infinite timeout. Leave blank for default (10000 ms).

TLS. ☒
Optional - the mail server requires the use of TLS security.

Username
Optional - if you use authenticated SMTP to send email, enter your username.

Change Password ☒
You need to provide the new password when changing the username.

Password
Optional - as above, enter your password if you use authenticated SMTP.

or

JNDI Location

JNDI Location
The JNDI location of a javax.mail.Session object, which has already been set up in JIRA's application server.

The configuration hasn't been changed in the last 24 months.
Currently emails are no longer being sent and the failed notifications can be seen in the Mail Error Queue.

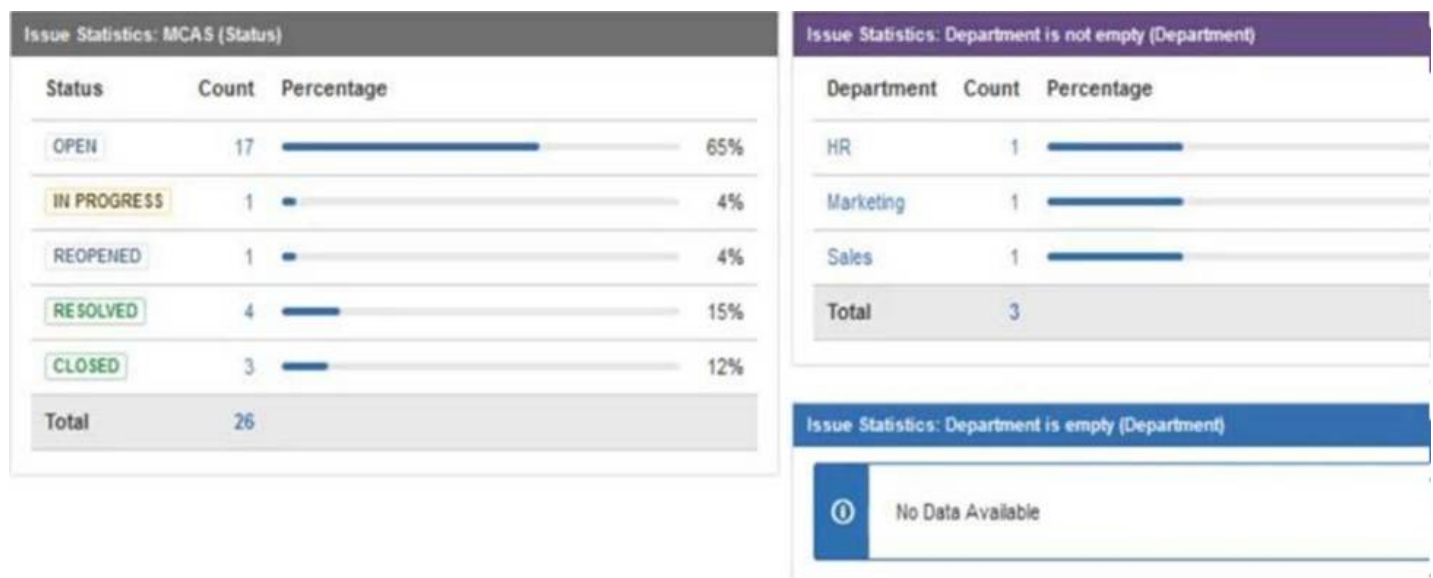

What is the likely cause of the failure?

- A. Email volume has increased and the Timeout is too low.
- B. The SMTP password has expired.
- C. The user jira has no valid Jira license.
- D. The database and/or server disk is full.
- E. The Jira license has expired.

Answer: E

37. Jan asked you to create a new Select List custom field called Department for his project MCAS. You created the field in the morning. In the afternoon, Jan notes that his Jira dashboard is not showing the field correctly. He asks to help him troubleshoot. View the Exhibit to see Jan's entire dashboard.

- The first gadget shows 26 issues in the project by Status.
- The second gadget shows that there are three issues that have the new Department field set.
- The last gadget shows "No Data Available". The filter query for that gadget is "project=MCAS and Department is empty."

Why does Jan's gadget say "No Data Available"?

- A. The field is marked Optional in the Field Configuration.
- B. Jan does not have the proper Browse permissions.
- C. The field context on the Department field was not set to allow empty values.
- D. You created the field Department but did not re-index the MCAS project.
- E. The JQL query for the filter is not valid.
- F. There is issue security on the issues.

Answer: C

38. You are moving a workflow from your staging Jira instance to production. On importing the workflow, Jira notifies you that the post-functions will not be imported. Staging Jira is on version 6.4 and production Jira is on version 6.3.

Why did this happen?

- A. The apps installed on staging are not the same as on production.
- B. The production and staging instances are using different versions of Jira.
- C. You exported the workflow as XML instead of JWB.
- D. Custom post-functions are not included in workflow export.

Answer: D

Explanation:

Reference: <https://confluence.atlassian.com/adminjiracloud/importing-and-exporting-issue-workflows962965084.html>

39. You have planned, tested, and performed a Jira upgrade.

The upgrade appeared to be a success; however, after several hours of use, your users are reporting significant problems and you decide to roll back.

Which two effects do you expect to see after the rollback? (Choose two.)

- A. Emails will automatically be sent out to tell people about the rollback.
- B. New issues entered between upgrade and rollback will be lost.
- C. The color scheme will be set back to default to indicate there was a rollback.
- D. Jira will go back to the same schemes as before the upgrade.
- E. Jira will need to be reconnected to other systems it was integrated with.

Answer: DE

40. Your user directories are configured as shown:

| Directory Name | Type | Order | Operations |
|--|--|-------|--|
| Company B (Deprecated) | Microsoft Active Directory (Read Only) | ↓ | Disable Edit Test Synchronise Last synchronised at 3/16/18 4:49 PM Full synchronisation completed successfully |
| Crowd Server (inactive) | Atlassian Crowd | ↑ ↓ | Enable Remove Edit Test Synchronise Last synchronised at 6/19/17 3:18 PM |
| Company A | Microsoft Active Directory (Read Only) | ↑ ↓ | Disable Edit Test Synchronise Last synchronised at 3/16/18 4:48 PM Full synchronisation completed successfully |
| JIRA Internal Directory You cannot edit this directory because you are logged in through it, please log in as a locally authenticating user to edit it. | Internal | ↑ | Edit |

The Active Directory administrators have just started the process of copying all the users from the old

Company B directory to Company A directory. During this process, the group membership is being changed to allow for more fine-grained security control.

A large number of migrated users complain that they do not have the correct new group memberships.

Which configuration change should you perform?

- A. Reorder the directories so Company A is before Company B.
- B. Enable the Crowd user directory.
- C. Reorder the directories so the Jira Internal Directory is listed first.
- D. Synchronize the Company A directory.

E. Disable the Company A directory.

F. Disable the Company B directory.

Answer: D

41. After a recent upgrade to your Jira system, one of the apps your organization depends on is not working reliably.

Which two methods can you use to debug and resolve this issue? (Choose two.)

A. Ask the System Administrator for catalina.out logs and inspect for stack traces.

B. Ask the System Administrator to enable the SQL log.

C. Ask the System Administrator to set package com.atlassian to Trace logging level.

D. Ask the System Administrator to add the app to the logger.

E. Ask the System Administrator to set the logging level to FATAL on all package names, Under Logging & Profiling.

Answer: CE

Explanation:

Reference: <https://confluence.atlassian.com/adminjiraserver/logging-and-profiling-938847671.html> <https://confluence.atlassian.com/crowd/logging-and-profiling-24248601.html>

42. A team is complaining that their Jira project is slow to use. You are able to replicate the slow behavior by viewing and trying to edit one of their issues.

Which logging option will help you or a system administrator to diagnose the problem?

A. Use the Log Analyzer to get more information about the issue view process.

B. Configure Jira to record and log the JavaScript execution from the browser console.

C. Set the logging to DEBUG level on all packages causing activity for that issue.

D. Enable profiling globally, so the logs can be inspected for anomalies when viewing the issue.

Answer: D

Explanation:

Reference: <https://www.elastic.co/guide/en/kibana/current/xpack-logs-analysis.html>

43. Max wants you to change the way the system fields Created or Updated are being displayed when viewing an issue.

How can this be achieved?

A. Adjust the Day Format in the Jira look and Feel configuration.

B. Adjust the jira.date.time.picker.java.format in the advanced settings configuration.

C. Adjust the jira.date.picker.java.format in the advanced settings configuration.

D. Adjust the Complete Date/Time Format in the Jira Look and Feel configuration.

E. Adjust the language and time zone preferences in Max's user profile.

Answer: E

Explanation:

Reference: <https://virginpulse.zendesk.com/hc/en-us/articles/206180140-The-time-on-my-Max-is-wrong->

44. Three team members have left the company and their issues need to be re-assigned to various users.

All of their issues are in the Marketing project which uses the Default Notification Scheme. The scheme has never been updated.

How do you inform the new assignees about their re-assigned issues?

- A. Add an announcement banner to the marketing project to inform team members.
- B. Perform a single bulk operation to mention all new assignees in a comment.
- C. Add an announcement banner to each new assignee's dashboard.
- D. Perform bulk operations to re-assign the issues and notify the new assignees.
- E. Use the Send email feature to inform the individual new assignees.

Answer: C

45. Which time tracking configuration can be controlled on a global basis for all projects in Jira?

- A. which users or groups have the ability to log work on issues
- B. whether time tracking fields are available on standard versus sub-task issue types
- C. the default time unit on estimates when users don't explicitly specify one
- D. which users have the ability to edit or delete their own or other users' worklogs
- E. whether Original Estimate is required when creating issues

Answer: C

Explanation:

Reference: <https://www.softwaretestinghelp.com/jira-time-tracking/>

46. A project manager wants to stay aware of the support requests that are being raised in his project.

He wants to know if:

- the team is able to handle the number of issues that are being raised in the project
 - there are team members who work on more than 2 issues at any given time
 - there are sets of issues that need significantly more time to resolve when compared to others over time
- Which three gadgets will show him the information he needs?

(Choose three.)

- A. Activity Stream
- B. Created vs. Resolved Chart
- C. Two Dimensional Filter Statistics

D. Resolution Time

E. Labels

Answer: ACE

47. Managers want to ensure that every issue in Jira always has an assignee. Which change will definitely meet this requirement?

- A. Update post functions to set the assignee appropriately at each workflow transition.
- B. Set Default Assignee to Project Lead in every project.
- C. Use components for automatic assignment in every project.
- D. Make the assignee required on workflow transition screens.
- E. Make the assignee required through field configurations.
- F. Set the global option "Allow unassigned issues" to OFF.

Answer: A

Explanation:

Reference: <https://community.atlassian.com/t5/Answers-Developer-Questions/Conditional-Post-Function/qaq-p/561594>

48. Your company will migrate to Jira. You plan to import with a CSV file. Which fields are required as CSV columns for your import?

- A. Project
- B. Project, Summary
- C. Summary
- D. Project, Issue Type
- E. Summary, Issue Type

Answer: C

Explanation:

Explanation: Each CSV file must possess a heading row with a Summary column

Reference: <https://confluence.atlassian.com/adminjiraserver/importing-data-from-csv-938847533.html>

49. Sundar's development projects are falling behind.

He wants to write a JQL query to find issues that meet all three of these criteria:

50. He is the project lead of the project or the project is DEV.

51. fixVersion had been set to 4.3 at some point but was later removed.

52. Issues were created in the first 15 days of this month.

The Exhibit shows the JQL query he created.

✓ (Project in ProjectsLeadByUser() or Project=DEV) AND
(FixVersion was 4.3 and FixVersion != 4.3 or FixVersion is EMPTY) AND
(Created > StartOfMonth()) and Created < StartOfMonth("15"))

Which statement about Sundar's query is true?

- A. The query will not return the right set of issues because the parentheses are wrong.
- B. The query will not return the right set of issues because lines 2 and 3 are wrong.
- C. The query will return the right set of issues, but it is inefficient.
- D. The query is well written and will return the right set of issues.
- E. The query is valid, but it will not run without a Jira Marketplace app.
- F. The query will not return the right set of issues because line 2 only is wrong.

Answer: E

53. A team complains that many of their issues are in the Closed status, but do not have a resolution set, which causes problems with reporting. The project uses a single workflow.

You want to set the resolution to Done on all existing issues in the Closed status. Which combination of workflow elements and a bulk operation will achieve this?

- A. - A temporary transition and a trigger
- An Edit Issues bulk operation
- B. - A temporary transition and a post function
- A Transition Issues bulk operation
- C. - A screen and the Resolution field
- A Move Issues bulk operation
- D. - A screen and a custom field
- An Edit Issues bulk operation
- E. - A temporary transition and a screen
- An Edit Issues bulk operation

Answer: A

54. Tom has asked you why the numbers returned by his searches are not right. He shows you three JQL queries:

| JQL | Number of Results |
|---|-------------------|
| ✓ project = "Cake baking" | 42 |
| ✓ project = "Cake baking" and fixVersion = 1.1.0 | 6 |
| ✓ project = "Cake baking" and fixVersion != 1.1.0 | 22 |

How can you fix this?

- A. Change the query to project = "Cake Baking" and fixVersion ~ 1.1.0.
- B. Change the query to project = "Cake Baking" and (fixVersion is empty or fixVersion != 1.1.0).
- C. Rename the versions so they do not contain periods.
- D. Identify the missing issues and change the permissions so that everyone can see them.
- E. Change the query to project = "Cake Baking" and fixVersion not in (1.1.0).

Answer: D

55. One of the HR managers created a filter and shared the subscription with members of the hr-managers group. The filter contains the following valid JQL query: Manager = currentUser() AND Manager in membersOf("hr-managers")

Which issues will be included in the subscription?

- A. Only issues where the user who created the filter is listed in the Manager field.
- B. Only issues where the group hr-managers is listed in the Manager field.
- C. Only issues where the recipient of the email is listed in the Manager field.
- D. All issues where the user listed in the Manager field is a member of the hr-managers group.
- E. All issues that are assigned to any member of the hr-managers group.

Answer: D

56. Your marketing company wants to evaluate Jira and purchased a 10-user license. A frequently changing group of key stakeholders C both internal employees and external customers C will participate in the evaluation.

If the evaluation is successful the company wants all 50 employees to start working with the tool.

You have to manage the frequently changing group of stakeholders and need to make sure only the intended users participate in the evaluation.

How should you meet these requirements?

- A. Create and manage the users for stakeholders manually in the internal directory.
- B. Connect Jira to your internal LDAP directory and whitelist the IPs of stakeholders.

-
- C. Enable public signup and CAPTCHA but limit account creation to stakeholders.
D. Disable public signup and grant all project permissions to Group Anyone.

Answer: D

57. Some of your project owners would like to make their projects publicly accessible over the Internet. These projects will not require login. You could support this by allowing read-only anonymous access to the projects. Which two additional factors should you take into consideration when setting this up? (Choose two.)

- A. Anonymous users could see other users' names.
B. Anonymous users could export all issues from Jira.
C. Licensed users might accidentally comment anonymously rather than logging in first.
D. Internet search engines could index data.
E. Anonymous users could find a full list of all your projects.
F. Spam bots could add comments.

Answer: BD

58. You have been asked to take on the administration of a second Jira installation in your company.

You were given the following information about user accounts:

- The company standard is to use Active Directory (AD) to provide user accounts.
- There are several Active Directory systems in use by different business units.
- The second Jira is not to be merged with your main Jira.
- The main Jira system is connected to Active Directory for user accounts.
- The second Jira is using internal user accounts, not Active Directory.
- People using the second Jira are using the same login ID as they would use in Active Directory.
- Your company would like to use Single Sign-on (SSO) but has not yet implemented it for either Jira system.

Which authentication method should you recommend?

- A. Change the new Jira to use your main Jira's directory services, as that is already reading your Active Directory services.
B. Set up a Crowd server to get the user lists from all internal directories and AD, and use AD directly for the password checking.
C. Set up a Crowd server to pull in all the AD services, and plan to migrate internal users.
D. Change the new Jira to link directly to the required AD servers.

Answer: B

59. Beehive Bank wants to implement Jira with the following requirements:

- Enforce the strictest possible security measures for user logins.
- Allow external users to create their own user logins.
- Use the Jira Internal Directory.

Which two login security options can you offer them? (Choose two.)

- A. Set Login Mode to Secure.
- B. Require character variety for the user name.
- C. Require that a password is not too similar to another user's password.
- D. Require a certain length for passwords.
- E. Require that a password is not too similar to the user name or email address.

Answer: AD

60. You have two issue types in your HR project: Hire and Fire.

Which two requirements can be met through changes only to field configurations? (Choose two.)

- A. For the Fire issue type, the Description field should have a default value of "Termination".
- B. For both issue types, the Employee Name custom field must be required upon creation and must never be blank.
- C. For the Hire issue type, the field description for the Due Date field should read "First day of work".
- D. For both issue types, the Resolution should be set once the issues are being resolved.
- E. For both issue types, the Assignee field should be hidden when creating but not when viewing an issue.
- F. For the Fire issue type, the default value for the Priority field should be Blocker.

Answer: DE

61. Your HR project has two issue types:

- Join
- Leave

Both issue types share a field configuration, screens and the workflow.

You currently use the Due Date system field to indicate when someone actually joins or leaves.

New HR staff members complain that using the Due Date field is not very intuitive. How can you help your HR team?

- A. - Create individual Join Date and Leave Date custom fields to replace the Due Date field.
- Create separate screens for each issue operation and issue type.
- Delete the Due Date field.
- B. - Rename the Due Date field to Join Date and create a separate Leave Date

custom field.

- Create new screens for the Leave issue type and replace the Due Date field with the newly created field.
 - Migrate existing field values to the new Leave Date field.
- C. - Create individual field contexts for each issue type.
- Label the Due Date field as Join Date and Leave Date in their respective contexts.
 - Associate each context with its matching issue type.
- D. - Create individual Join Date and Leave Date custom fields to replace the Due Date field.
- Appropriately migrate existing data from the Due Date field to the new custom fields.
 - Remove the Due Date field from all project screens.

Answer: C

62. You install a new Jira instance using only the default configurations.

A team approaches you to set up a project with the following specifications:

- There are four standard issue types and three sub-task issue types.
- The first sub-task will need a new screen for the Edit operation.
- The second sub-task will need new screens for both the Create and Edit operations.
- Everything else should use the default configurations.

How many new Screen Schemes do you need to create?

- A. 7
- B. 4
- C. 1
- D. 3
- E. 2

Answer: B

63. You set up a new project for a team. Soon afterward, users report that a field is missing from one of their screens. You check the screen configuration in the administration panel and you see that the field should be present.

Why can't the users see the field?

- A. The changes to the screen were not published.
- B. The issue operation wasn't mapped to a screen.
- C. The field context does not include the project and/or issue type.
- D. The users don't have permission to view that field.

Answer: D

64. A dashboard displays an Issue Statistics gadget as shown.

The dashboard owner wants to change the order of the statuses shown in the gadget to appear as follows.

65. To Do

66. In Progress

67. Ready For QA

68. Blocked

69. Rejected

70. Done

Which action will permanently arrange the statuses into the required order?

A. Reorder the statuses on the Status administration page.

B. Change the Sort Direction option in the gadget to Ascending.

C. Change the category of the statuses.

D. Add numbers to the status names to allow them to be sorted in numerical order.

E. Change the gadget Sort By field to Total.

Answer: D

Explanation:

71. A team of technical writers works in the WRITE project. The project uses a single, shared workflow. To better match the team's way of working they request a workflow

change: The initial status of their project's workflow should be changed from Open to Awaiting Inspiration.

- You navigate to the Workflows section of the administration, update the Name of the status in the workflow designer and publish your change.

What are two implications of this change? (Choose two.)

A. The workflow scheme for the WRITE project will need to be published before the change takes effect.

B. Awaiting Inspiration will be created as a new Status in Jira.

C. Transitions to the Awaiting Inspiration status will fail until the post functions for those transitions are updated.

D. Filters and Gadgets that referred to the Open status by name will be broken.

E. The Open Status will be changed to Awaiting Inspiration in all workflows using that status.

Answer: AB

72. You are tidying up a Jira project and find that the following two issue types are being used.

- Task

- Assignment

They seem very similar. If both are not needed, you could convert all existing Assignment issues in the project into Task issues and remove the Assignment issue type from the project.

Which project configurations would you check to see if it is necessary to keep the two as separate issue types instead? (Choose three.)

A. Issue Security Levels

B. Field Configurations

C. Components

D. Permissions

E. Workflows

F. Field Contexts

Answer: ABF
